he literally blew the minds of 90 medical professionals who kept asking him questions so late into the evening that the cleaning crew had to ask us to leave.

Julielynn Wong, MD, MPH

## SAMPLE SPEAKING TOPICS

### *The future will always find us, but will we find the future?*

What happened to horses when we moved from natural to artificial power? What happens to humanity when we move from natural to artificial intelligence? What happens when your toothbrush is smarter than you? Where do you go? What do you do? What will happen to your business, to your country, to our civilization and to yourself? Are we going to become immortal, live in a utopian abundance and spread throughout the cosmos? Or will humanity fight a dystopian AI Giga-war, become enslaved and ultimately go extinct like the dinosaurs?

### *Technology is the “How”, not the “Why” or “What”*

Technology is the new religion, Silicon Valley is the new chosen land and entrepreneurs are the new chosen people. They promise a future that is better than we think – a techno-heaven of abundance and, naturally, immortality. And we are all believers now. But are we the masters, or are we the tools of our tools? Are we exhibiting religious fetishism for technological objects? Are we creating personality-cults around techno-prophets? Are we falling for new techno-religions? Is power in the hands of those behind, or those in front of the screen?

**What:** Straight talk about our future of exponential technology, disruptive change, and Artificial Intelligence.

**Who:** Nikola Danaylov, Bestselling Author, Keynote Speaker, Vegan, Futurist and Philosopher.

**Creds:** Nikola’s [Conversations with the Future](#) is a #1 Amazon International Bestseller. His Singularity.FM is the most popular podcast in the niche and reason why he has been called the “Larry King of the Singularity.”

**Where you’ve seen him:** Nikola has spoken at many public events on technology, Artificial Intelligence and the future of humanity. His Singularity.FM has had over 6 million views and has been featured on the BBC, Space, MTV, WIRED, ArteTV, TV Japan, Channel NewsAsia, RTL4, the Telegraph, io9, the Huffington Post, ZDNet, BoingBoing and many others.

**His message:** What if your car doesn’t need a driver anymore? What if we don’t need to age and die? What if machines get smarter than us? What happens to your business? What happens to you? Because no matter who you are or what you do, the future will always find you. Question is: Will you find the future?!...

**Why book him:** What if instead of fear of the future – you see opportunity, instead of an end – you see a beginning, instead of loss – you see profit, and instead of death – you see life? What if you and your organization get Future-primed?

**Who will benefit:** Those who would rather surf the tsunami of disruptive change rather than get drowned by it.
